Sliding Carousel Challenge

Attached is a PDF showing a carousel of products with 4 visible product listings. The goal of this challenge is to create the carousel in code and have a total of 8 product listings that can be scrolled through.

Design:

Using only HTML/CSS/JS, recreate the image below in an HTML file. Do not use any frameworks such as Bootstrap, Material Design, jQuery, etc. Only vanilla all the way.
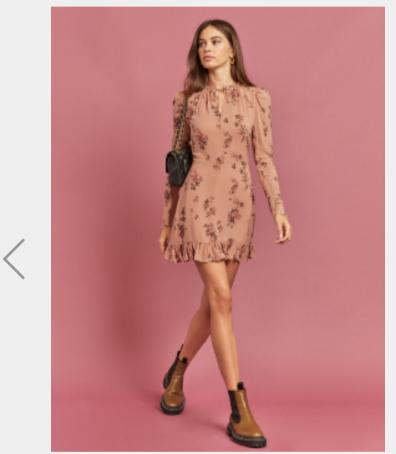

Features:

- When the right arrow is clicked the carousel will slide 4 product listings to the left.
- When the left arrow is clicked the carousel will slide 4 product listing to the right.
- If the 8 listings are scrolled all the way to the right, the left arrow does nothing on click.
- if the 8 listings are scrolled all the way to the left, the right arrow does nothing on click.
